As a QA Engineer specializing in Testing and Refactoring, I bring extensive experience in the fields of E-commerce, SaaS, and form testing for public sites. My expertise in using Cypress.IO enables me to ensure the quality of web applications, and with my ability to quickly identify and resolve issues, I help improve the efficiency of applications.

I have deep knowledge of testing methods and techniques and am capable of successfully applying them to various projects. Through code refactoring, I contribute to making it more readable and maintainable.

As a decision-maker in management, you are undoubtedly interested in my ability to ensure the quality and integrity of applications and to help improve their efficiency. I am confident that my experience and expertise in these areas would be a valuable addition to your team.

Education

- 2003: IT Specialist for Application Development
- 2022: Cypress.IO Ambassador

Languages

- German, English

Focus Areas

- E2E Website and API Testing with Cypress.IO and Codeception
